12:00 Dismissal Preschool
- 12:30 Dismissal K-4

## June 4, 2021

### Virtual Visit of LLE for First Graders

On Wednesday, the second graders and first graders had a virtual Zoom visit. Prior to meeting, the first grade students wrote friendly letters asking questions about LLE. The second graders wrote back answering the questions. During the Zoom visit, the students had a chance to see each virtually, which the children thoroughly enjoyed! At the end, the students watched a video-guided tour of LLE. Thank you to the first and second grade teachers, and Mr. Nerkezian for making this a tremendous success!

## Summer Fun Ideas!

Now that the summer weather is rolling in, we often spend more time outside. The Very Well Family blog has many great ideas on how to utilize summer weather to its fullest! Some ideas include:

1. Build a water blob or slip n' slide
2. Fly a kite
3. Go fishing
4. Build an obstacle course in your backyard
5. Have water balloon fights
6. Take a hike

Here is the link to find out more!

### **Spotlight on Third Grade**

The third grade cannot believe that this year is already coming to an end! Students have been having a blast learning new concepts in various subjects. In science, we have been learning about animal life cycles. They witnessed how a butterfly starts as an egg, turns into larva, goes through a pupa stage, and eventually becomes an adult. After the butterflies matured, we celebrated their release in the school field. In math, students have been learning about time and measurement. They enjoyed creating their own analog clocks and practicing elapsed time. In reading, we are finishing up the chapter book *Because of Winn-Dixie*. Students have enjoyed reading this book as a class while jotting predictions, inferences, connections, and more! Third graders are excited to write to incoming students about their time in third grade and offer advice as well as share all of the knowledge that they have acquired!
